

PRODUCT DATA SHEET

PLIOGUM® 1027K1 Elastomer

CHEMICAL DESCRIPTION

PLIOGUM® 1027K1 is a ground crumb version of PLIOGUM® 1027, butadiene-styrene copolymer manufactured in accordance with food-additive requirements (FDA Regulation 172.615, Chewing Gum Base). PLIOGUM® 1027 is ground through a 5/8" screen, then blended with approximately 5.6% high purity, ultrafine talc, food grade, as a partitioning agent to prevent the crumb from agglomerating.

All specification limits except for partitioning agent content apply to the base polymer before grinding.

APPLICATIONS

PLIOGUM® 1027K1 is widely used in chewing gum base and bubble gum base applications. It is most suitable for gum with a regular or soft chew.

It is also used in other food contact applications, such as food can sealant. It is a highly branched polymer capable of handling high filler loading.
